Experience

- Jul 2023 – Present Junior Data Scientist at [indigitall](#), Spain
- Oct 2021 – June 2022 Research Intern at [CBGP](#), Spain
- Automated an HISAT2-StringTie pipeline with Bash and Python for transcriptome assembly using Arabidopsis RNAseq files.
 - Conducted differential gene expression **data analysis** in Arabidopsis and visualized the results using **data visualization** techniques, in R.

Education

- 2022 – 2023 MSc in Data Science at [Polytechnic University of Madrid, Spain](#)
Specialized in data processing, cloud infrastructure, statistical data analysis and machine learning. Awarded as one of the top four academic records for the 2022/23 academic year.
- 2018 – 2022 BSc in Computational Biotechnology at [Polytechnic University of Madrid, Spain](#)
Special interest in data mining, machine learning and database management.

Professional development

- 2023 – 2023 Machine Learning Engineering for Production (MLOps) Specialization at [DeepLearning.AI](#)
- 2021 – 2021 MOOC: Machine Learning and Big Data for Bioinformatics at [University of Granada, Spain](#)
100 hours.

Projects

- 2023 – 2023 MSc thesis about GPT models – at [Polytechnic University of Madrid, Spain](#)
Developed a custom chatbot assistant fueled by GPT models and using a REST API built with Flask. Provides a seamless user experience through a locally hosted frontend page powered by waitress

Grants

Collaboration fellowship with University departments, 2021/2022.

Languages

Spanish (native), English (proficient, C1) and German (basic).

Skills

- Experienced in **Python** and **Bash**.
- Comfortable with **R**, **MySQL** and **LATEX**.
- Familiar with **Git**, **Flask**, **Docker**, **HTML** and **CSS**.
- Basic knowledge of **Spark**, **Java**, **JavaScript**, **FastAPI** and **Django**.
